WAREHOUSEMEN'S RATE GUIDE

Compiled and revised by a Committee composed of leading members of the American Warehousemen's Association engaged in the various lines of Warehousing, appointed by the Association for this special work, and published as a guide for the establishment of prices on various commodities in the different lines of warehousing. The rates here given have been carefully collected from all parts of the country and have been accepted by commercial bodies as fair rates.

“Organized for the purpose of promoting the interests of warehousemen throughout the United States, elevating the standard of the business, encouraging a more enlarged and friendly intercourse among its members, and generally to advance the welfare of the warehousing business and all matters relating thereto.”—Extract from Articles of Incorporation.

The American Warehousemen's Association, is composed of one hundred and fifty-three of the leading firms and companies engaged in the storage of general merchandise, cold storage, storage of household goods, transferring and distributing, and was organized October 15, 1891, for the purpose of advancing the interests of warehousemen throughout the United States, by the dissemination of information concerning the industry, and the promotion of uniform laws, customs, etc. The Association has enjoyed a prosperous career, and the high standing of its members, and its conservative policy have assisted materially in elevating the standards of the business to a high plane in which its members and warehousemen generally may have great pride. Copy of constitution and by-laws, application blanks, or any information regarding the Association may be obtained upon application to the Secretary.

GENERAL MERCHANDISE

RULES AND SUGGESTIONS

In revising this Guide, it is borne in mind that many factors enter into the making of an equitable storage rating, such as the volume of business and character of the service, etc., and that local conditions vary greatly in different cities and states; therefore, the general principle followed in preparation of the annexed Schedules for General Merchandise is the suggestion of ratings on the various commodities stored in quantities and under circumstances permitting advantageous handling, piling, etc., and with the liability of the warehouseman limited to that imposed by law. The cost of extra space, labor, services or liability (if assumed by the warehouseman) should be separately considered, and customary ratings made and allowed are referred to in detail below.

On merchandise not specified herein, the following rules should apply:

Square Foot For each square foot of floor space occupied a storage charge of 10¢ per month, weight not to exceed 250 lbs. and piled 10 ft. high.

Cubic Foot For each cubic foot of space occupied, a storage charge of 1¢ for both storage and labor, weight not to exceed 40 lbs.

Bonded The rates of storage and labor on articles not enumerated should correspond with those charged for packages of similar size and property of like general description, otherwise to be 1½¢ per cubic foot when usually charged by measure, or 3¢ per 100 lbs. when usually charged by weight, or a half of a cent per gallon for liquids.

Weight For each ton of 2,000 lbs., a storage charge of forty cents if not occupying more than 5 ft. square or 40 cu. ft.

Labor Where labor is mentioned it is to be understood as the ordinary labor of receiving and storing, and delivering to warehouse door; and according to nature of the merchandise, should be charged from 50 to 100 per cent. of the storage rate for one month, and based on rating of 40¢ per hour.

Value When the value of any package of merchandise exceeds \$300.00 the warehouseman should charge the rate herein quoted, plus one-tenth of 1% for each additional \$100.00 or fraction thereof.

Date Storage Commences The rates of storage are per month or fraction thereof dating from the receipt of the first package.

When Month Expires The monthly rate should be charged from date up to but not including date of following month, i. e., goods received December 2nd may remain until the night of January 1st, but if on hand January 2nd, should be charged an additional month's storage.

Transfers in Storage When goods in storage are transferred on the books from one party to another a new storage charge should commence on the date of the transfer, and the goods should be treated as a new lot.

Right to Terminate The warehouseman should reserve, unless permitted by statute, the right to require the removal of goods stored by the month upon reasonable notice under circumstances existing.

Minimum Charges The minimum charge on any lot or balance of lot should be 50¢ per month.

Ton is 2,000 lbs. Where the words "per ton" are used, a ton of 2,000 lbs. is to be taken in fixing rates of storage and labor unless otherwise expressly stated.

Packages Other Than Scheduled Should packages be offered other than are described in this Guide, i. e., barrel in place of sack, cask in place of barrel, box in place of barrel, see under "Barrels with Contents," "Boxes with Contents," "Casks with Contents," etc.

Articles Not Specified Various commodities are omitted from this list that are seldom stored or are stored in very small quantities. Some of these may be found in the list of General Merchandise in Bond. On such goods a reduction of 25% from bonded rates is suggested when goods are stored in free storage.

Negotiable Receipts When a negotiable receipt has been issued, under no circumstances should the removal of the goods be permitted until the negotiable receipt is returned to the possession of the warehouseman.

Written Orders Required In ordering the delivery of goods, customers should in all cases be required to send written orders indicating the number of packages wanted, together with the lot number and descriptive marks.

Special Piling When goods are stored by piece, numbers, marks, sizes, or are of exceptionally large size, an extra charge to be agreed upon should be made.

Weighing, Gauging, Inspection When goods are taken down and repiled for weighing, gauging or inspection, a charge should be made.

Space for Repacking These rates do not include space for repacking, sampling, or labor furnished by the warehouseman for that purpose. Charges are subject to special agreement.

Cooperage A cooperage charge should be made when goods are received in such condition as to require cooperage.

Handling Seeds and Grain Seeds and grain bulked or sacked from bulk should be charged at the rate of 1¢ per bushel.

Delivery from Track Goods sent to the warehouseman in car-load lots may be removed from the cars without charge, provided this be done on the day of arrival and without handling by the warehouseman. Delivery of goods from cars exclusive of labor, but including checking, a minimum charge of \$2.50 should be made.

Loading Cars Unloading Cars When the warehouseman loads or unloads cars, a charge of 1¢ per 100 lbs., minimum \$3.00 per carload should be made.

Delays to Empty Cars The warehouseman not being responsible for delays in obtaining cars ordered for the shipment of goods, such delays should not entitle customers to the extension of the storage limit.

Cartage In the business district, the charge should be 5¢ per 100 lbs. with a minimum charge of 50¢. Outside of the business district, special rates should be made.

(NOTE: The above does not apply to hollow ware, tinware or other light commodities or to very heavy goods. Special rates should be made on these, subject to local conditions.)

Delays If teams are delayed in making a delivery of goods, there should be an extra charge at 75¢ per hour for the delay. This time should be established by the party receiving the goods signing for the hour of the arrival of the team and the hour unloading begins.

Extra Help When goods are so heavy as to require extra help, there should be an extra charge of 40¢ per hour per man.

- Package Delivery** A matter of special contract in each individual community.
- Extra Service** A well equipped warehouse should be in position to render to the merchant or manufacturer any service he may require either in such warehouse work as weighing, coopering, sampling, etc., or such office work as reporting, etc., as would be done by a branch office. The warehouseman is in a position to perform such service at a less cost than his customer could do it for himself. A charge should be made for all extra services rendered.
- Reports** When daily reports are furnished, a charge of 2¢ each for a report of each delivery should be made.
- Bills of Lading** A charge of 2¢ should be made for each bill of lading. A charge of 2¢ should be made for each duplicate sent to consignee.
- Exception** In quoting rates for shipping it is usually preferable to include the cost of clerical work, postage, etc., in connection therewith, making it a separate rate from any other labor charge.
- C. O. D. Delivery** For making collections at delivery a charge of one-tenth of 1% of the amount collected should be made with a minimum charge of 10¢ for each collection.
- Freight Charges** When freight charges are advanced by the warehouseman, either incoming or outgoing, the amount should be subject to sight draft with receipted freight bill attached and for this a minimum charge of 10¢ should be made. If carried as a lien against the goods, interest should be charged.
- Claims.** For claims against a railroad company when the warehouseman is pursuing the claim, a charge should be made.

Warehouse Receipts Warehouse receipts issued should by their terms give notice of the service undertaken and the liability assumed thereunder by the warehouseman, whether it be limited to that imposed by law, or special conditions or guarantees mutually agreed to or excepted and must show the charges and rating for which a lien is claimed.

HOUSEHOLD GOODS

RULES AND SUGGESTIONS

(See Rules and Suggestions preceding the General Merchandise Section.)

Orders All orders, complaints or other communications to the warehouse should be in writing.

Preliminary Packing If the warehousemen will insist upon the proper packing and protection of household goods before storing, much dissatisfaction will be prevented at delivery.

Packers' Labor The warehouseman being held to a strict accountability for his packers, a charge of 60 cents per hour for skilled packers is submitted.

Labor in and Out No labor in or out charge is given, though it is customary to make such charge, especially when goods are received from or delivered to drays other than those controlled by the warehouseman (\$1.00 to \$2.00 per load). It is customary in some cities to include the labor charge with the cartage, i. e., cartage per van load \$7.00 will mean \$5.00 for cartage and \$2.00 for labor.

Cartage It is advisable, when possible, to charge for all cartage work by the hour as the truckmen will not then be detained to set up furniture and do other work at the expense of the warehouseman, and the customer is called upon to pay only for work actually performed. A minimum cartage charge of \$5.00 per van load is submitted.

Non-Negotiable Receipts Non-negotiable receipts are generally used for household goods and are preferable.

Listing Goods The practice is quite general to number and list each package as received at the warehouse. If the cus-

tomer submits a list of pieces and packages to be stored, each piece and package bearing his private number, misunderstandings will be avoided by incorporating these numbers in the warehouse receipt.

Separate Storage of goods in separate rooms should be at Rooms a higher rate of charge than in open storage.

Articles of Value It is becoming the practice for the warehouseman to limit his liability to fifty dollars for any piece or package except when a value is declared at the time of storing when an additional charge of one-tenth of 1% per month is made for the additional valuation. This rule should be impressed upon the customer at the time of storing or when making the preliminary arrangement.

Inspection and Selection Where goods are gotten out for inspection or selection, a labor charge of fifty cents per hour for each man employed should be made.

Space for Examination of Goods When extra space is required for examination of goods extending over several days a charge to be agreed upon should be made.

Advance Notice of Delivery When deliveries are to be made, advance notice of at least twenty-four hours should be insisted upon.

Commission for Selling When goods are sold at private sale on customer's order a charge of 10% to be deducted from the proceeds of the sale is suggested.

Trunks, cu. ft.....	.50
Boxes, cu. ft.....	.50
Carpets, cu. ft.....	.50

Monthly Rates Monthly rates are sometimes charged on packages, trunks, boxes and carpets at one-fifth the 6 months' rate with a minimum charge of 50 cents. With valuation, the valuation charge is $\frac{1}{10}$ of 1% per mo.

Precaution Against Claims As precaution against claims and to avoid controversy, it is advisable to have each garment, rug, carpet, etc., carefully examined and its condition entered on the receipt before issue.

Charging by Percentage of Value Warehousemen in some cities are governed by the custom of furriers and charge from one to three per cent. of value on furs, etc., for guarantee against moth, fire or loss for the season April 1 to January 1 following. Where this is customary a minimum or base rate is recommended.

Advance Notice for Delivery Advance notice of at least twenty-four hours should be insisted on for delivery of all furs and unboxed goods from cold storage.

COLD STORAGE

RULES AND SUGGESTIONS

The rules and suggestions preceeding the rates given herein for general merchandise, free, are to be considered in connection with the goods in this division.

Monthly Rates Preferable The general list of rates here given is on a monthly basis, and the best practice is to charge by the month, but with such commodities as eggs, apples, dried fruits, etc., stored in large quantities, it is customary to quote a season rate if requested. The season period differs somewhat by reason of the locality of the warehouse.

When Month Commences When the rate of storage is by the month, the month commences with the receipt of the first package.

When Month Expires The monthly rate should be charged from date up to date but not including date of following month, i. e.: Goods received Dec. 2nd for one month's storage may remain until the night of January 1st, but if on hand Jan. 2nd, should be charged an additional month's storage. This rule should not be waived.

Choice of Rate When there is both a season and a monthly rate, the monthly rate should apply in all cases, unless the season rate is distinctly specified in writing by the customer at the time of storing. If the customer specifies the season rate then he should be charged that rate no matter how short a time the goods remain in storage.

Charges After Season Season rates have a definite time of expiration, and all goods on hand at the close of the season period should immediately thereafter be charged at the monthly rate.

Rates Based On Values These rates are on a basis of a maximum value of \$5.00 per cubic foot. For any higher value an additional charge of one-tenth of 1% of the additional value should be added to the rate.

Labor Rates given herein include labor in and out unless otherwise specified.

Minimum Charges No small lots received for less than 50¢ per month storage charges.

Objectionable Packages No fresh goods in closed barrels or boxes should be accepted for freezing, except by special arrangement. Experience has shown that goods are not properly frozen when stored in closed or large packages.

Space for Repacking Not Included These rates do not include space for repacking.

Repacking Charges for repacking are subject to special agreement.

Transfers in Storage When goods in storage are transferred on the books from one party to another a new storage charge should commence on the date of the transfer, and the goods should be treated as a new lot.

Negotiable Receipts When a negotiable receipt has been issued, absolutely under no circumstances should the removal of the goods be permitted until the negotiable receipt is returned to the possession of the warehouseman.

Written Orders Required In ordering the delivery of goods, customers should in all cases be required to send written orders indicating the number of packages wanted, together with the lot number and descriptive marks.

Right to Terminate The warehouseman should reserve the right to require the absolute removal of goods stored by the season at the end of the season on thirty days' notice prior to the end of the season. On goods stored by the

month, the right should be reserved to require their absolute removal on thirty days' notice, irrespective of the date of receipt.

Warehouseman's Liability The warehouseman is not responsible for fire loss. The warehouseman is not responsible for loss from providential causes or vermin.

Special Piling Where goods are stored by piece numbers or sizes or are of exceptionally large size, an extra charge to be agreed upon should be made.

Weighing, Inspection, Repacking When goods are taken down and repiled for weighing, inspection or repacking a charge should be made.

Cooperage A cooperage charge should be made when goods are received in such condition as to require cooperage.

Delivery from Track Goods sent to the warehouseman in carload lots may be removed from the cars without charge, provided this be done on the day of arrival and without handling by the warehouseman. For delivery of goods from cars exclusive of labor, not including checking, a minimum charge of \$2.50 per car should be made.

Loading Cars When the warehouseman loads cars, a minimum charge of \$2.50 per carload should be made.

Delays to Empty Cars The warehouseman not being responsible for delays in obtaining cars ordered for the shipment of goods, such delays should not entitle customers to the extension of the storage limit.

STORE DOOR DELIVERY AND PACKAGE DELIVERY

Cartage In the business district the charge should be 5¢ per 100 lbs. with a minimum charge of 50¢. Outside of the business district special rates should be made.

(NOTE. The above does not apply to light commodities or to very heavy goods. Special rates should be made on these. These rates are subject to local conditions.)

Delays If teams are delayed 30 min. in making a delivery of goods, there should be an extra charge of \$1.00 per hour for the delay. This time should be established by the party receiving the goods signing for the hour of the arrival of the team and the hour the team leaves.

Extra Help When goods are so heavy as to require extra help, there should be an extra charge of 40¢ per hour per man.

Package Delivery A matter of special contract in each individual community.

EXTRA SERVICE

A well equipped warehouse is always in a position to render to the merchant or manufacturer any service he may require either in such warehouse work as weighing, cooperating, sampling, etc., or such office work as reporting, etc., as would be done by a branch office. The warehouseman is in a position to perform such service at a less cost than his customer could do it for himself. A charge should be made for extra service rendered.

Reports When daily reports are furnished, a charge of 2¢ each for a report of each delivery should be made.

Bills of Lading A charge of 2¢ should be made for each bill of lading. A charge of 2¢ should be made for each duplicate sent to consignee.

Repacking When packages are opened and repacked in original or in new packages, a charge should be made for the box and labor.

C. O. D. Delivery For making collections at delivery a charge of one-tenth of 1% of the amount collected should be made with a minimum charge of 10¢ for each collection.

Freight Charges When freight charges are advanced by the warehouseman, either in-coming or out-going, the amount should be subject to sight draft with receipted freight bill attached and for this a charge should be made. If carried as a lien against the goods, interest should be charged.

Claims For claims against a railroad company, when the warehouseman is pursuing the claim, a charge should be made.

Postage Postage should be charged when frequent statements are made.

GENERAL ORDER RATES

Ports of New York and Boston

RULES AND REGULATIONS.

General Order rates at New York and Boston as adopted by the Collector of Customs, the merchants and warehousemen of New York and Boston. Approved by the Secretary of the Treasury.

The following rules shall govern in the determination of proper charge for General Order cartage, storage and labor:

1st. The rates herein enumerated apply to cartage not exceeding one mile. For each additional mile, or fraction thereof, an extra charge should be made equal to one-quarter of the regular rates specified.

2nd. Ferriage shall be added to the rates named herein.

3rd. When lighters are employed in the transfer of merchandise to points within the limits of the port, this schedule of rates, plus fifty per cent., shall apply.

4th. Storage, labor and cartage on gaugable merchandise shall be computed on the gaugable capacity of the packages.

5th. The rates of storage, labor and cartage on articles not enumerated shall correspond with those charged for packages of similar size and property of like general description.

6th. The rates of storage are per month dating from the receipt of the first package from the vessel.

7th. If the goods are withdrawn at any time during the first month, one month's storage shall be charged. After the first month, storage shall be computed by the half month.

8th. The rates of labor include both the receipt and delivery of the goods.

9th. Articles, such as Amber, Bird Skins, Egrettes, Gold and Silver bullion and manufactures of Gold and Silver, Human Hair, Jewelry (real), Medicinal Preparations of high value, Meerschaum, Essential and Volatile Oils, Paintings, Platinum, Precious Stones, Vanilla Beans, Watch movements, and cases, or any other non-enumerated articles of high

value, shall pay one-eighth of one per cent. of the appraised value.

10th. For the purposes of this schedule, where the words "per ton" are used, a ton of 2,000 lbs. is to be taken in fixing rates of storage, labor and cartage, unless otherwise expressly stated.

11th. The decision of the Collector as to the charge for cartage, storage and labor on all unenumerated articles shall be final.

The cartage embraced under this schedule is as follows:

All cartage of unclaimed imported merchandise from the wharves or other places to bonded warehouses, or to the United States Appraisers' Warehouse, or from any bonded warehouse to the United States Appraisers' Warehouse, as well as the designated packages of imported merchandise from the United States Appraisers' Warehouse to bonded warehouses.

Custom House licenses for carting bonded goods must be renewed in Cartage Bureau, annually, between October 1st and December 31st.

Any merchant, cartman or truckman who is duly licensed by the city authorities, upon presenting his said license, producing evidence of good character and executing a bond in the sum of \$5,000, with two sureties, or one security company for the faithful performance of his duty, and taking the usual oath, may be appointed a Custom House cartman; and the driver of each bonded vehicle must be sworn to faithful performance of duty.

Each cart, truck or dray which may be bonded under these regulations must be marked in some permanent, conspicuous place, in letters and figures of not less than two inches in length, painted in white letters on a black ground, "Custom House License, No. —."

For the cartage of merchandise ordered sent to U. S. Appraiser's Warehouse $9\frac{1}{2}$ cents per package. Sample packages sent to U. S. Sample Office 5 cents each. Automobiles \$6.00.

For the cartage of unclaimed merchandise from any bonded warehouse, to the United States Seizure Room, U. S. Appraiser's Warehouse, when ordered there for sale, three cents per package.

Warehousemen Who Store Household Goods

A booklet containing a list of Warehousemen who store household goods as revised to 1912.

Address

WALTER C. REID, Treasurer

32 E. 42nd St., New York

The Storage Rate Guide

**Edition
1912**

COMPILED and revised by a committee composed of leading members of the American Warehousemen's Association. Gives rates on General Merchandise, free and in bond; Cold Storage rates with rules and suggestions: Agricultural Implements and Household Goods.

The rates given were carefully collected from all parts of the country and have been accepted by commercial bodies as fair rates.

Price in Cloth - - \$1.00
In Flexible Morocco - 1.50

Practical Cold Storage

By Madison Cooper

THE most comprehensive and thorough work on Cold Storage. It covers the design and construction of buildings and apparatus for the preservation of perishable products. Approved methods of applying refrigeration.

It gives much practical information on the handling and storing of Eggs, Butter, Cheese, Apples, Pears, Peaches, Furs, Fabrics, etc. It dwells on Freezing and Storing Fish, Creamery and Dairy Refrigeration, Cold Storage for Fruit Growers and Nurserymen, Temperatures for various products, etc., etc.

Profusely illustrated. Contains about 550 pages.
